## SKILLS

**Languages:** JavaScript(ES5 & ES6), Python, C#, SQL, CSS, HTML5 **Tools & Frameworks:** Sequelize, Flask-SQLAlchemy, React/Redux, Pug, Express, NodeJs, Flask, Jinja, Alembic, Docker, Git, Postbird, Postman

**Other:** Use of common logic structures to control code execution, Various Unity APIs, Use and implementation of various data types, Integrating code into existing systems, Game Design & Development

## PROJECTS

**GoodMango** [Express, Pug, Javascript, HTML5, CSS3, SQL]

[Link](#) | [Github](#)

- Used JavaScript DOM manipulation to allow dynamic rendering of the user changes and an intuitive design on the frontend via CSS and html queries.
- Built a digital library of manga books allowing users to explore a multitude of current and past manga releases organized by genre types through backend associations.
- Implemented iframe via pug templates to render a youtube video styled to fill the full view width and view height of the home page as well as writing css animation for text scroll on the x-axis.

**Nomadr** [Express, React/Redux, Javascript, HTML5, CSS3, SQL]

[Link](#) | [Github](#)

- Using the React library I was able to import React's Calendar component to allow users to book vans for several days or weeks or months using date ranges.
- Created a child component for the navbar to handle profile dropdown features via JSX and helper functions.
- Explored grid layout in CSS to design a 75% / 25% split on the listings page to allow scrolling on only the left side, allowing the right side to be occupied by a static element like google maps or an image.

**The Stonks** [Python, React, Redux, Javascript, HTML5, CSS3, Flask]

[Link](#) | [Github](#)

- Implemented modal design and functionality to give the site a more intuitive feel allowing me to further explore CSS animations and prop threading.
- Used API to allow real-time updates on company performance history to watch and predict the market.
- Wrote equations built to handle buying and selling portfolio values to reflect accurately for the user from the backend to the frontend design.

**Artsy** [Python, React/Redux, Javascript, HTML5, CSS3, Flask]

[Link](#) | [Github](#)

- Created a hub for artists to showcase their digital artwork for direct feedback on the site from other members.
- Designed the comments component using React/Redux listening for state changes to ensure smooth dynamic rendering and set up conditional statements to filter accurate information to be rendered.
- Implemented Intuitive design through the usage of modal design as well as React built components supported by redux state updates allowing dynamic usage of the website.

## JOB EXPERIENCE

**Bloomin' Brands International (Bonefish Grill) - October 2019 - August 2021**

Server/Bartender | PARAMUS, NJ

**T-Mobile USA - August 2014 - September 2019**

Mobile Expert/Marketing/Samsung Rep | PARAMUS, NJ

**The Sports Authority - July 2011 - August 2014**

Senior Sales Associate | PARAMUS, NJ

## EDUCATION

**App Academy**

Full Stack Software Engineering

**William Paterson University**

Bachelor of Business Administration (Concentrations: Management and Marketing)

**New York, New York**

August 2021 - present

**Wayne, New Jersey**

Class of 2020
