## SKILLS

**Languages:** JavaScript(ES5 & ES6), Python, C#, SQL, CSS, HTML5

**Tools & Frameworks:** Sequelize, PostgreSQL, Flask-SQLAlchemy, React/Redux, Pug, Express, NodeJs, Flask, Jinja, Alembic, Docker, Git, Postbird, Postman

**Other:** Use of common logic structures to control code execution, Various Unity APIs, Use and implementation of various data types, Integrating code into existing systems, Game Design & Development

## PROJECTS

**GoodMango** [Express, Pug, Javascript, HTML5, CSS, SQL]

[Link](#) | [Github](#)

A group project - clone of Goodreads allowing users to create bookshelves and store mangas

- We decided to use JavaScript DOM Manipulation to allow dynamic rendering of user changes, using Express I was able to join tables to reference the correct data relationships strengthening the intuitive design on the frontend.
- Built a digital library of manga books via seed data for Anime and Manga enthusiasts, allows users to explore a multitude of current and past manga releases.

**Nomadr** [Express, **React/Redux**, Javascript, HTML5, CSS, SQL]

[Link](#) | [Github](#)

An Individual midterm project - clone of Airbnb where hosts and users book and rent travel vans

- Nomadr is an Airbnb clone aimed towards Van/RV owners. The design was made possible using css grid layout as well as utilizing queries on the frontend to give the functionality a smooth field on the browser
- Using Google Maps API I was able to showcase locations on Van rentals for the user to have a better UI/UX experience

**The Stonks** [Python, React, Redux, Javascript, HTML5, CSS, **Flask**]

[Link](#) | [Github](#)

A group project - code intensive clone of Robinhood where users can practice stock trading

- A final group project, The Stonks is a Robinhood clone aimed to benefit beginner/intermediate stock investors. Using Yahoo Finances stock API, the frontend was built to allow real time updates on Company Graphs to watch and predict the market
- The backend POST and EDIT routes had equations built to handle buying and selling portfolio values to reflect accurately

**Artsy** [Python, React/Redux, Javascript, HTML5, CSS, **Flask**]

[Link](#) | [Github](#)

Final Capstone Project

- I was able to create a hub for digital artists to showcase their masterpieces for direct feedback on the site from other members, using forward thinking CSS design users can view a beautifully crafted display of art work, with access to a relatable/supportive community via the comments component.
- Implemented Intuitive design through the usage of modal design as well as React built components supported by redux state updates allowing dynamic usage of the website.

## JOB EXPERIENCE

- **Bloomin' Brands International (Bonefish Grill)**  
October 2019 - August 2021      Service Manager | PARAMUS, NJ
- **T-Mobile USA**  
August 2014 - September 2019      Mobile Expert/Marketing/Samsung Rep | PARAMUS, NJ
- **The Sports Authority**  
July 2011 - August 2014      Senior Sales Associate | PARAMUS, NJ

## EDUCATION

<b>App Academy</b> <i>Full Stack Software Engineering (Python and JavaScript)</i>	<b>New York, New York</b> August 2021 - present
<b>William Paterson University</b> <i>Bachelor of Business Administration (Concentrations: Management and Marketing)</i>	<b>Wayne, New Jersey</b> Class of 2020
<b>Bergen Community College</b> <i>Associates in Science</i>	<b>Paramus, New Jersey</b> Class of 2014
